## ***for flat panels***

*The Audipack truss mounts for flat panels are*

*the perfect and solid solution to mount flat panels to truss constructions.*

**Audipack®**

*It's great to have solutions...*

# Installing flat panels *safe* and *quick* to a *truss*

Flat panels can't be mounted easier to a truss than with one of the Audipack truss mounting solutions.

Audipack offers a program of flexible and safe products.

Speed and safety are key elements at Audipack when flat panels are being installed to trusses. With a minimal use of tools, external materials and risks the panels can be installed.

A fixed mount is available which is directly mounted to the truss.

A product line with several lengths of tubes, for a more flexible way of installing flat panels is also available.

To install your flat panel to an Audipack product an additional flat panel bracket is needed.

See chapter "Mounting brackets for flat panels" on page 29 for an overview of the available brackets.

- ▲ Telescopic models available
- ▲ Easy and safe installation
- ▲ Suitable for Ø 50 mm truss
- ▲ Free adjustable angle

Stainless steel security cable: **399941**

## DIRECT TRUSS MOUNT

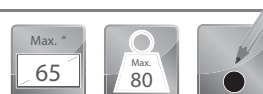

2 X

Ref.	390694
Dimensions in mm excl. clamps	W 450 x D 30 x H 450
Suitable for truss width in mm	250 - 300
Truss diameter in mm	50

Ref.	392560
Dimensions in mm excl. clamps	W 530 x D 30 x H 450
Suitable for truss width in mm	300 - 400
Truss diameter in mm	50

## TRUSS TUBE SETS

Ref.	FTC-1500T
Length in mm	909-1500
Truss diameter in mm	50
Tilt adjustment in degrees	0-20°
Rotation in degrees	360°

Ref.	FTCD-1500T
Length in mm	909-1500
Truss diameter in mm	50
Tilt adjustment in degrees	0-20°
Rotation in degrees	360°
